

New Emergency Unit Ready For Anything—And Usually Gets It

Mrs. Shalmir Chatfield (left) of Administrative Planning demonstrates modern intercommunication system during employee tour before opening of new Emergency Unit.

When the new Emergency Unit opens in the near future, it will be the second major patient care facility to be completed in the current Development Program, and will give Beth Israel Hospital the most modern facilities in the area for emergency care.

From the easily accessible rotary driveway, patients can be wheeled through automatically opening doors directly to treatment rooms. A double corridor plan provides a central core from which nursing and house staff can move as quickly as needed to the six treatment rooms, or to the special purpose rooms along the opposite corridor.

A passageway along the far wall of the treatment rooms will allow free circulation of doctors and nurses in a mass casualty situation. One corridor provides straight line access to the emergency elevator so patients can be moved swiftly to the Operating Room, Radiology Service or to inpatient treatment areas.

Flexibility Highlights Service

Each special room contains full facilities and can be quickly converted to a treatment area if it is necessary to expand to accommodate mass casualties.

Special features include lighting that can be adjusted to the degree of brightness required for effective patient care; sleeping quarters for "on-call" house staff; built-in equipment in each room to supply oxygen, air and suction; seclusion rooms for patients especially needing quiet; and an inter-communication system which allows the head nurse to respond to patients from her station as well as providing room to room contact for and with the staff.

"The design of the new unit incorporates advanced medical and architectural concepts for high quality patient care," according to Jerome R. Sapolsky. As Director of Administrative Planning since 1962, Mr. Sapolsky has guided much of the programming of our \$7,500,000 construction program. In addition, Miss Dorothy Bernstein, Assistant Director of Nursing, Ambulatory Services, has played a major role in the planning of these facilities.

December Tours Held

During December, a series of informative tours of the new unit were conducted by the Administrative Planning Division and the Public Relations Division. "All employees and members of the staff were invited to see the new facilities prior to the day of opening so patient service would not be interrupted by touring groups," Mr. Sapolsky said. He noted that the Emergency Unit entrances near the driveway and on the first floor should only be used by those involved in care of emergency patients.

Dr. Lee In New Year's Greetings

Nineteen hundred and sixty-four was marked by great progress at Beth Israel. Early in the spring we saw the Medical Alumni Association hold a highly successful reunion; the Unit Manager Program began to bear fruit as noted in comments from patients; we joined others in the new Northeastern College of Nursing; and our volunteers made possible the Visitor Pass System, so helpful to patients.

Research widened in numerous areas, and we established a new Electron Microscopy laboratory. The expanded, entirely new, Emergency Unit was readied to serve increasing numbers of patients. Two national conferences organized by B.I. physicians brought to Boston leaders

(Cont. on page 2, col. 3)

Leaders Elected At Annual Dinner

More than 600 community and medical leaders witnessed the election of Beth Israel's new President at the Hospital's Annual Dinner last month.

Mr. Samuel L. Slosberg, well-known industrialist and philanthropist, was elected the 14th President of the Hospital succeeding Isidor Slotnik, who served from 1961 to 1964.

Dr. Bibring Honored

Honored at the Dinner were Dr. Grete L. Bibring, retiring Psychiatrist-in-Chief at Beth Israel and Clinical Professor of Psychiatry at Harvard; Dr. George Packer Berry, Dean of the Faculty of Medicine at Harvard; and Mr. Slotnik.

Other speakers of the evening were Dr. Sidney S. Lee, General Director of the Hospital; Dr. Herrman L. Blumgart, Emeritus Physician-in-Chief of B.I. and Emeritus Professor of Medicine at Harvard; and Dr. Helen Tartakoff, Associate Visiting Psychiatrist.

Former Hospital Presidents congratulate newly elected President Samuel L. Slosberg. Left to right: Rudolph H. Wyner, Sidney R. Rabb, Mr. Slosberg, Isidor Slotnik, Abram Berkowitz and Dr. Sidney S. Lee, General Director.

Nursing Names Miss Repetto

Miss Catherine L. Repetto has been appointed Assistant Director of Nursing Service for Maternal and Child Health. She came to Beth Israel with a broad background as instructor and clinical supervisor in obstetrical nursing and in teaching parents' classes.

A graduate of the Lawrence Memorial Hospital School of Nursing of Medford, she holds the B. S. degree in Nursing and the M. S. degree in Nursing Education from the Boston University School of Nursing.

United Fund Drive Goes Over Top

A combination of enthusiasm, hard work and strong response enabled Beth Israel to top all previous records in the United Fund drive this year.

A committee of 32 captains, chaired by Mrs. Blanche Sullivan, Telephone, and Mr. Louis Stein, Public Relations, succeeded in raising \$3,895.20, exceeding last year's total by more than \$800.

The thirty-two captains were: Michaela Rosenberg, Maintenance; Mildred Sutton, Laundry; Mrs. Charlotte Carley, Housekeeping; Ellen Hackman, Blood Bank and Photography; Mrs. Carole Harrington, Purchasing; Mrs. Lila Felt, Pharmacy; Joanne Arone, Clinical Labs; and Jane Mansfield, Pathology.

Also, Roberta Finer, Radiology; Mary Hynes, An-

One World of Medicine Seen in Hospitals Ties Abroad

Medical Leaders Take Israel Tour in Hospital Study

With more than 200 hospital officials from 20 countries in a study group starting from Tel Aviv early last month were Dr. Sidney S. Lee, General Director; Mrs. Abraham E. Pinanski, Honorary Trustee; and Dr. William S. Easton, Anesthetist. The 12-day tour of the International Hospital Federation took them to nine major hospitals.

Addressing Beth Israel's Annual Dinner November 22 on his return, Dr. Lee noted:

"At Tel Hashomer in Tel Aviv, Dr. Maurice Lerner was using techniques which he worked on here with Dr. Morris Simon. And Dr. Chaim Sheba, Professor of Medicine at the new University of Tel Aviv School of Medicine, especially wanted me to let Beth Israel know how effective the blood volume machine was in the care of their patients in cardiac surgery.

B.I. Work Continues Abroad

"At Emek Hospital in Affula, which serves all of northern Galilee, I was met at the door by Dr. Fleischman, the Director. He immediately took me to see Dr. Israel Alkalay who is continuing work in pulmonary physiology which he began in our Medical Research laboratories with Dr. Myron Stein.

"Then in Jerusalem at the great Hadassah Hebrew University Medical Center, we saw on all sides people who had been at Beth Israel. There, as at Tel Hashomer, I saw patients scheduled for surgical implantation of Dr. Paul Zoll's cardiac pacemaker.

"At Hadassah, too, I chatted with Mrs. Miriam Pechenik, Director of

President Zalman Shazar of Israel greets Dr. Sidney S. Lee, General Director of Beth Israel, during reception which climaxed eighth Study Tour of the International Hospital Federation, held this year in Israel. The Federation is composed of doctors, hospital officials, administrators.

A moment of relaxation during Sabbatical is enjoyed by Dr. Benjamin Alexander (right) with Professor Ephraim Katchalski of the Department of Biophysics at the Weizmann Institute. In addition to time spent in Israel, Dr. Alexander also visited more briefly the National Blood Transfusion Service in France, the Karolinska Institute in Sweden and the University of Basel in Switzerland.

Weizmann Institute Contributes Data to B.I. Blood Research

New knowledge of the mechanisms in blood coagulation is beginning to unfold in the Hematology Unit in Yamins as a result of studies undertaken in a year abroad by Dr. Benjamin Alexander, Physician at Beth Israel, Director of the Unit, and Associate Professor of Medicine at Harvard.

Describing his year as a "fruitful exchange," Dr. Alexander explained that he first spent nine months with Professor Ephraim Katchalski in the Department of Biophysics at the Weizmann Institute in Israel. His purpose was to apply techniques evolved there to determine whether certain soluble enzymes involved in blood clotting could be reproduced in insoluble form.

Worked With Proteolytic Enzymes

The proteolytic enzymes with which Dr. Alexander worked in Israel normally activate or dissolve proteins and are linked, in ways not fully understood, to the series of events which take place in blood clotting. Because these enzymes are soluble, it had never been possible hitherto to remove them from mixtures or to apply them to blood to analyze their precise effect.

Successful in adapting the Weizmann research with polyamino acids which make the enzymes insoluble to his own area of interest, Dr. Alexander returned to Beth Israel briefly last December and June, bringing with him tiny vials of insoluble proteolytic enzyme (trypsin) particles for concurrent studies here. These are being fruitfully pursued in collaboration with Drs. Araceli Engel and Liberto

(Cont. on page 4, col. 2)

B.I.'s Weekly Wash 2000 Times More Than Average Family's

Multiply the average family's weekly wash almost 2000 times and you begin to near the 54,000 pounds of sheets, spreads, blankets, towels, wash cloths, uniforms and special items processed each week in the B.I. Laundry.

Smoothly Co-ordinated Activity

Located in newly painted quarters covering more than 500 square feet in the basement of the Gryzmish (North) Building, the Laundry is the scene of smoothly co-ordinated activity from 7:45 a.m. to 4:30 p.m. every Monday through Friday, and has part-time coverage on weekends. It is one of eight departments of the House Services Division under Silas M. Wass, Director.

Its efficiency, attested to by inspectors of the American Institute of Laundries, is the result of conscientious daily performance by the 29 men and women on the staff.

Hospital Standards Are High

The Laundry is under the able supervision of Miss Mary White, Department Head, and her capable assistant, Miss Mildred Sutton. While they share an of-

fice in the center of the Laundry, both work side-by-side with the staff. Their desk work is reserved for times when the machinery is stopped — the late hours of the afternoon, and Saturday mornings.

Despite the volume and variety of items, each is laundered, sorted, folded and distributed in accordance with specific standards for hospital needs. Soiled linen moves via laundry chutes from patient floors to sorting areas in the basement. It is brought in hampers from the Operating Room, Emergency Unit and OPD clinics.

Special Formulas Are Used

Every uniform worn in the hospital is washed, dried, and pressed. Small items, and delicate ones, are placed in net bags before being washed. Different washing formulas and rinsing cycles are used, depending, for example, on whether linen is for the Pediatric Service or the Operating Room. Folding and handling of baby linen is done in one of several rooms for specific purposes.

(Cont. on page 3, col. 3)

Miss Mary White, Head of Laundry Dept., and Miss Mildred Sutton, Assistant, check schedules during quiet moment in busy day.

Dr. Lee Gives '65 Greetings

(Cont. from page 1, col. 1)

in research on Pulmonary Embolism and in the teaching of Psychiatry. Not the least of our gains was the establishment of the Master Medical Plan for B.I. employees and their families.

As the New Year opens, we may all view the fu-

ture with a sense of pride in what we have accomplished together. May I wish each and every one of you, and your families, the best of the Holiday season — and good health and good fortune in 1965.

Sidney S. Lee

Career Choice Guides Others Into Nursing

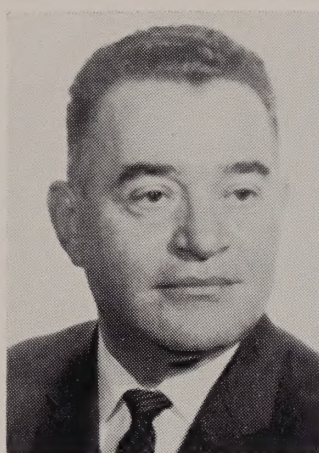

A bright and enterprising lady arrived at Beth Israel from Portland, Maine one day "just because I wanted to work in Boston," and this month she was awarded a ten-year Service Pin.

Helen Doucette, who supervises a department of close to 40 people, has been at the helm of Central Services for almost all of her tenure here, and from her enthusiasm it would appear she plans an extended stay.

She organizes and supervises the work of 12 orderlies, 20 nurses' aides, 3 surgical dressing nurses, 1 secretary and 1 head nurse with a quiet dignity that is the mark of her profession.

Quiet Dignity

Helen wanted to be a nurse when she was still in grade school and upon completion of high school there was no question — she went directly to the Mercy Hospital in Portland for her training. Her satisfaction with her choice has been so contagious that three of her nieces are following in her footsteps.

Louis G. Baizman

X-ray Teacher Learns Much In B.I. Work

The year was 1955 and Dr. Felix G. Fleischner, Radiologist-in-Chief, heard of an excellent X-ray technician who was working for the U. S. Public Health Service in Brighton and determined to bring him to B. I.

Great Experiences

And since that time, our Chief Technician in Radiology has been Louis G. Baizman. Giving up a Civil Service position was quite a decision to make. "But," smiles Lou, "it was more than equal to the security. The years I have spent at B. I. have afforded me some of the greatest experiences of my life."

When Lou first decided to study X-ray, back in 1936, there were no schools where one could go for formal training. It was necessary to search for training both theoretical and practical—and this Lou did. He studied with Dr. Max Ritvo at Harvard and took a special course offered by General Electric and when he went into Civil Service he was furnished additional training.

Since coming to B. I., Lou has become an Instructor in X-ray Technique and Positioning at Northeastern and has taught the hundreds of students who have enrolled for the X-ray Technology course. "Radiology is changing so rapidly these days that one must constantly be learning and teaching. There is nothing quite as exciting as working in a teaching-research hospital," says Lou.

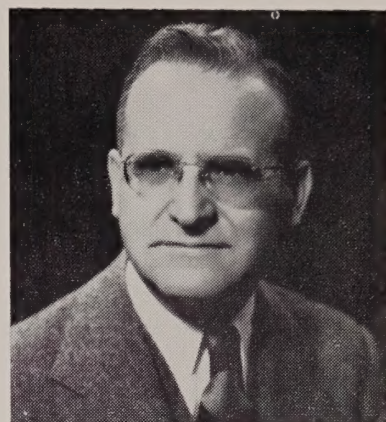

And Mr. Baizman's partiality extends to Boston as well—where he was born and where he has raised his own wonderful family. He is the proud father of two lovely daughters and grandfather to two robust tykes.

Staff Council Chooses 1965 Officers

Dr. Samuel L. Gargill, Visiting Physician at Beth Israel and Associate Clinical Professor of Medicine at Harvard, was elected to the post of President of the Staff Council in October after serving as Vice President during the previous year. He succeeds Dr. Maurice O. Belson, Associate Visiting Obstetrician-Gynecologist.

The Council is elected by the entire active staff and represents a cross-section of the staff. It meets every two months and holds two general meetings annually for the entire visiting staff.

Also elected as Officers were Dr. Louis Burke, Associate Visiting Obstetrician-Gynecologist and Dr. Elliot L. Sagall, Assistant Visiting Physician. They became Vice President and Secretary-Treasurer respectively. Both Drs. Belson and Sagall are instructors at Harvard, and Dr. Burke is Assistant in OBS-GYN there.

Holiday Party Sees 70 Win Pins

A record number of employees participated in the Holiday Open House festivities this month. Refreshments, colorful decorations and rhythmic music all combined to lend that perfect touch to the

gala Holiday celebration.

The afternoon's festivities were climaxed when service awards were presented to 70 of Beth Israel's employees by Samuel L. Slosberg, Hospital President, and Dr. Sidney S. Lee, General Director.

Plans for the Holiday party were implemented by Co-Chairmen Jeanette Harpel of Clinical Labs and Mrs. Helen Swartz Boyer of Personnel. Assisting Chairmen were: Mrs. Helen Zola of Fiscal Services, Hosts and Hostesses; Frank Sullivan, Miss Michaela Rosenberg and John Cusack of Maintenance, Decorations; Mrs. Esther Bradbard of the Gift Shop, Flowers; Mrs. Jane Arketook of Dietary, Refreshments; and Richard Zaunere of Housekeeping, Invitations.

Twenty-year awards were presented to Henrietta Giardini of the Main Kitchen and Dr. Mark Lesses, Head of the Hospital's Blood Bank.

Receiving ten-year awards were Dr. Sidney S. Lee, General Director.

(Cont. on page 4, col. 2)

New Hospital President, Samuel L. Slosberg, congratulates recipients of 10-year Service Award Pins. From left to right: Mr. Slosberg, Mrs. Emma Brooks, Dietary; Mrs. Carolyn Kretchmar, Fiscal Services; and Dr. Sidney S. Lee, General Director.

Staff Loyalty "Tops" In Laundry

(Cont. from page 2, col. 2)

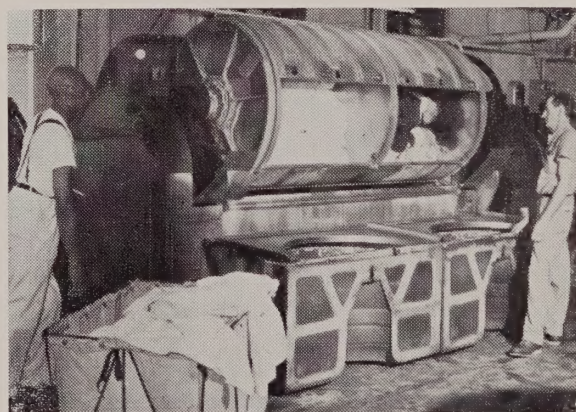

Equipment ranges from large washing machines which can hold up to 350 pounds to a hand iron for finish work. There is a large automatic ironer for sheets and spreads, an extracting unit raised and lowered by a small crane; dryers and several pressing units.

Teamwork the Key

Deadlines are firm, for the fresh clean linen must be weighed, sorted as needed, and moved out of the laundry on schedule — in neatly arranged racks for patient units, in marked bundles for house staff, and in properly filled hampers for the nurseries.

That it does is a tribute to the hard work, loyalty and devotion of the staff, many of whom have earned Award Pins for long hospital service.

On the staff are: Juozas "Joe" Anelauskas, Pascual Beltran, Arthur Berg, Mrs. Mae Burke, Mrs. Ginevra "Jennie" Ciccocioppo, George Doyle, Mrs. Annie Dunn, Mrs. Glenna Duty, Clarence Fletcher, Colman Folan, Joseph Gagnon, Mrs. Alleain Harrall, Mrs. Stella Hatch, Mrs. Mary Jakas, Mrs. Yvonne Masliah, Mrs. Erma McKnight, Mrs. Pixie "Peggy" Metro, Mrs. Mary Noseworthy, Mrs. Ora Roberts, Mrs. William Santos, Mrs. Gussie Schycon, Henry Szebra, Mrs. Sally Shore, Sidney Judge Skelton, Mrs. Maria Sowa, Mrs. Agnes Trask, and Eugene Zazofsky.

Unloading 350-pound washer into extracting unit are Sidney J. Skelton (left) and Colman Folan.

In Memoriam

Beth Israel Hospital mourns the death of two beloved members of the hospital family and extends heartfelt sympathies to their families:

Dr. Louis M. Freedman, Consultant in Otolaryngology — December 12, 1964.

Morris J. Rabinovitz, Treasurer — December 25, 1964.

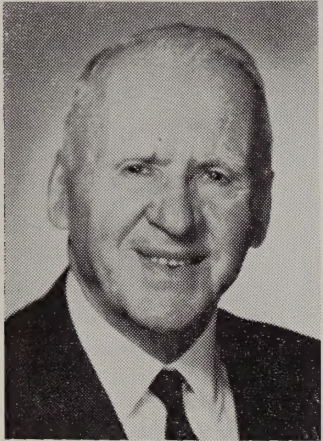

Helen Doucette

The Central Services department prepares all the supplies that are used throughout the Hospital — from the Operating Suite to the Medical and Surgical Floors and the OBS-GYN floors. "It's the wonderful team work that we've achieved that does it," says Helen proudly.

Satisfactions

Life now holds many other satisfactions for Helen, who chides herself for having limited her fun-time in the past. "I found a new hobby this past summer which I know I'm going to enjoy — antiques." And Helen also plans to extend her travel itinerary.

Profile of A Trustee

Joseph F. Ford

"Life will be as good to us as the things we do for others," commented Joseph F. Ford, discussing the philosophy that has guided his own life.

He early earned an enviable reputation for personnel practices which made the Ford Manufacturing Company a model for labor-management relations throughout the country. Typical of the expression of his philosophy was the trip to the 1939 World's Fair to which he invited as his guests 500 of his employees and members of their families.

Benefactions Returned

A Trustee of the Hospital since 1937 and an Honorary Trustee since 1957, Mr. Ford has seen this generosity returned in many benefactions given by his employees in the name of Clara and Joseph F. Ford. Among these was the first blood bank established in Boston and given to Beth Israel Hospital in 1939, in memory of Jennie Ford, his mother.

Mr. Ford is a founding Trustee of Brandeis University and was its first Treasurer for thirteen years. He is also a member of the corporation of Northeastern University, a member of the Board of Managers of the Boston Dispensary and its Reha-

Phone Dictation Eases Medical Records Work

An instrument that looks almost exactly like an ordinary phone and a small grey dictaphone machine have combined to increase the efficiency of Medical Records administration.

Expedites Records

Every patient floor, except 3 South and 1 South, is now equipped with a Dictaphone Telecord. This is a device which allows the doctor to dictate into a phone which transmits the message directly to the dictaphone belt in the Medical Records Department.

Used by the House Staff for all Ward admissions and available to the Medi-

cal Staff for all patient discharges, this new equipment saves the doctor many of the trips he previously made to the Medical Records Room and also expedites the preparation of records in the Medical Records Department.

United Fund

(Cont. from page 1, col. 5)

esthesia; Mrs. Linda Wise, Psychiatry; Bunny Woods, Social Service; Mrs. Evelyn Murphy, Switchboard; Peggy Lane, House Services and Personnel; Ina Kantor, House Record Room; Wilda Routhier, Nursing; Mrs. Jean Cohen, Administrative Floor; Marilyn Krasnof, Fiscal; and Martha Cole, Library and Volunteer Service.

And also, Janet Silin, Admitting; Betty Paquin, Formula Room; Mrs. Libby Aronofsky, Cafeteria; Mrs. Helen Berman, Dietary Office; Mrs. Jane Arketook, Main Kitchen; Mrs. Ann Kingston, Department of Medicine; Carole Townsend, Surgical Research; Mrs. Virginia Johnsen, Kirstein Hall; Mrs. Sally Price, Emergency Unit; Thomas E. Doyle, Unit Managers; and Mrs. Pearl Arnold, OPD Nursing.

Dora Zolotin, all of Nursing.

And also: Betsy Crabtree, Dr. Harvey Goldman and Mrs. Clara Rev, Pathology; Harry Freeman, Radiology; Dr. Otto Glaser, Medical Research; Jeanette Harpel, Clinical Lab; Harry Libman, Pharmacy; Mrs. Nelvia Rosales, Blood Bank; Mrs. Elvira Showstark, Photography; Mrs. Sandra Sirull, Physical Medicine; and Ernest Spigulis, Surg-Animal Farm.

Thirty, ten and five-year awards were also given by Mrs. Harold Ullian, President, to employees of the Women's Auxiliary: Lillian Aronson, 30-year award; Mrs. Esther Davidson, Mildred M. Goldings, Booker Kellum, Mrs. Adeline Sommerfeld, and Mrs. Jacqueline Wolf, 10-year; and Mrs. Esther Bradbard, 5-year.

lows to the early hospital, and he always remembers her saying that "the only thing you leave behind you is what you give away."

Holiday Party

(Cont. from page 3, col. 5)

Director and Dr. George Altman, Home Care physician. Also, from Fiscal Services, Mrs. Carolyn Kretschmar; Laundry, Mrs. Glenna Duty; Purchasing, Robert McSweeney; and Housekeeping, Samuel Goodman, Mrs. Palma Ru'so, Jadwiga Sucheicka and Mrs. Elizabeth Walker; Dietary, Mrs. Emma Brooks; Nursing, Harold Blake, Helen Doucette, Mrs. Margaret McEachern, Clarence Remy, Mrs. Louis Rhone, Mrs. Dorothy Taylor, and Mrs. Corinne Walker.

Five-year awards were presented to: William Sweeney, Fiscal; Mrs. Ginevra Cicciocioppa, Mrs. Aleian Harrall, Mrs. Ora Roberts, Mrs. Agnes Trask, Laundry; Franciszek Czup, John Holubiak and Lester Wall, Maintenance; Helen McGrath, Mrs. Genevieve Miret, and Mrs. Blanche Sullivan, Telephone; Mrs. Mabel Maxwell, Alexandre Varlamoff, Mrs. Margaret Washington and Mrs. Gussie Williams of Housekeeping.

Also receiving five-year awards were: Mrs. Mamie Crawford, Mrs. Natalie Emelianov, and Elijah Lomon, Dietary; Gilbert Guy, Personnel; Joanne Boucher, Anne Marie Egan, Mrs. Jeanette Freeman, Helen Giers, Sybil Goulkin, Mrs. Martha Johnson, Mrs. Lillian Krick, Mrs. Helena Lawrence, Mrs. Bernice Pollock, Mrs. Inez Prescod, Mrs. Sally Price, Mrs. Lila Reis, Mrs. Sonia Rosenberg, Mrs. Rose Ruderman, Mrs. Nathalie Scott, Mrs. Fay Sher, Mrs. Helen Tallen and

bilitation Center, a member of the corporation of the Boston Museum of Science, and is a member of the Boston University Human Relations Center.

What's Going On?

Reporters

Elaine Israel, Clinical Services; Mrs. Sally M. Goldstein, Fiscal; Mrs. Jean Cohen, House Services; Mrs. Sonia Rosenberg, Nursing; Eleanor Krasnow, OPD; and Frances Cochios, Yamins.

Fiscal Services

Welcome to our newcomer, Christa Molting. A "Holiday Party" was held at Mrs. Helen Epstein's home on December 18th for the entire division.

House Services

Welcome to new employees: Ronna Pariser, Admitting Clerk; Mrs. Clara Calvo and Carmen Pineda, Info and Mail; Mrs. Frances Dillon, Mrs. Alice Kinder and to a returnee Mrs. Marcella Pauley, Telephone. Also hello to Michaela Rosenberg, John Christiansen and Charles Awalt, Maintenance. Congratulations to Mrs. Lois McKinnon, Info and Mail, on her younger son's recent marriage. Best wishes to Frank Sullivan, Maintenance who was married to Diane Delaney in October. So glad to have you back, Fred Silver-smith, Maintenance, after your three-week vacation in Europe. Congratulations to Mrs. Mary Fitzpatrick, Telephone, on her 25th Anniversary.

Nursing

Congratulations to Mrs. Cynthia Wilkinson, whose son William, age 20, was elected to "Who's Who in American Colleges and Universities." Mrs. Wilkin-son has been at B.I. for more than 12 years and is justly proud of her son who is studying at the University of Mass. Welcome aboard to Mrs. Geraldine Ketter, E.U. nurse; Claire Daly, Head Nurse on 5S; Kurland and Zoll.

Lorraine Fraser, Supervisor on 5S and to Marion Alpert, Staff Nurse on 4S. Mrs. Gloria Bellamy has become new Guidance Counsellor at the Nursing School and Martha Lambertson is now an Instructor — good luck in your new positions.

OPD

Welcome to our new Physical Therapist Supervisor, Marion Eiden and to Joan Sisson, OPD Record Room. Congratulations to Tony Carrasquillo, Health Service, who became Mrs. Lewis LaFontaine in November.

Public Relations

A tres gaie Holiday Party was held at the home of the Lou Stein's for all the staff plus a few "special guests."

Yamins

Welcome to our newcomers: Phil Howe, Mrs. Sheila Ward, Mrs. Elizabeth Turner, Dr. Jerome Appelbaum and to Mrs. Beryl Preston who came to us from Liverpool, England. Also a happy hello to Mrs. Corina Prokai, also from England, to Lester Isenstadt, Dr. Randolph Seed, Alan Okstein, Neil American Colleges and Frankyl and to David Ward who is a pre-doctoral student from the University of Chicago.

Hearty felicitations to Rosemary Davidson who was married in July to Dr. Chester T. Flynn, Jr. Rosemary is secretary to Drs. Daly, Head Nurse on 5S; Kurland and Zoll.

One World

(Cont. from page 2, col. 1)

Nursing, who had spent three months with Miss Dora Zolotin here before the opening of the new 600-bed Medical Center. And I saw our own Frances Simon, a B.I.H. School of Nursing graduate and long-time member of our nursing staff.

"But what was most important was recognition of the fact that medicine is but one world, and that what we are doing in our own hospital in Boston is felt around that world."

Research Results

(Cont. from page 2, col. 3)

Pechet.

Another important result of Dr. Alexander's work at the Weizmann Institute was the chemical preparation of thrombin in insoluble form. This material, too, was unavailable previously, and is now being utilized in B. I. studies of the conversion of prothrombin to thrombin (and the clotting of fibrinogen)—key steps in the blood clotting process.
